## RESEARCH PROJECTS

### Intelligent Document Analysis (Metso Oyj) (GPT Labs) (03/2026 - 03/2026)

- Built an AI-driven document analysis and extraction system using FastAPI, ChromaDB, and React, enabling natural-language queries, multi-document comparison, structured data extraction, and secure role-based access with full audit logging.

### Road Accident Analysis using Deep Learning (02/2019 - 02/2020)

- Built a neural network model that achieved 91% accuracy on an open-source dataset containing multiple variables related to road-accident occurrence, following extensive research.

### Comparative Analysis of IPv4 and IPv6 in accordance with E-Learning (02/2017 - 02/2018)

- Tested IPv4 and IPv6 performance for E-Learning across multiple test beds, finding IPv4 to outperform IPv6 by 20%, indicating IPv6 still requires significant optimisation.

### Sharing of Cellular Network over GSM Freq. Bands in Cellular Phones (02/2017 - 02/2018)

- Managed to find out a way to share ones mobile data over GSM frequency bands that were not being used. (Lack Of Funds)

## TRAINING CERTIFICATES

Certified Ethical Hacking (CEH) (2016)

Cisco Certified Network Associate (CCNA) (2016)
